Exacq expands its Enterprise solution with the EM-Series 500 from Johnson Controls

MILWAUKEE (February 13, 2020) – [Johnson Controls](#) is introducing a new edition to its recently launched exacqVision EM-Series, part of its Enterprise edition of video management solutions.

The new EM-Series 500 can manage and monitor up to 500 exacqVision Enterprise recorders making it an ideal, cost-effective solution for installations in the retail, education and government markets. The EM-Series was designed to run the Enterprise Manager software and together offers a robust platform with a simplified approach to enterprise video management.

Through an intuitive dashboard, Enterprise Manager provides access to all the benefits of an enterprise level solution including enhanced health status monitoring, user management, updates and camera license transfer capabilities all at no additional cost. Using a single vendor for both software and hardware helps ensure a smooth installation and seamless technical support.

The EM-Series 500 features RAID 6 and enterprise-class front-loading hard disk drives for uninterrupted operation. Designed with cybersecurity in mind, the exacqVision EM-Series adheres to the rigorous standards of the Johnson Controls Cyber Solutions Product Security Program to guard against cyber-threats.
